OBEDIA to Provide DAW Training and Support for Purchasers of Terra Digital Audio Music Computers

Los Angeles, August 15, 2007: OBEDIA, the music and audio industry's premier provider of global 24/7 technical training and support, is pleased to announce that Terra Digital Audio, makers of high performance computers optimized for music applications, will be offering an OBEDIA service package with each new Terra Digital M6-R Core 2 Duo and MX2 Quad Core computer system sold.

The program launches with a special introductory promotion, running from August 15th through September 15th, 2007, that puts a customized 65-minute OBEDIA package (a \$99.99 value) in the hands of Terra Digital Audio users at no charge.

"Terra Digital Audio prides itself on creating rock-solid audio computers that are truly plug-and-play," beamed YC Song, Terra Digital's CEO. "We optimize every aspect of the computer, from the dual and quad core processors to the silent heat pipe video card to the vibration-reducing chassis to the whisper-quiet fans. So when you load in your Pro Tools software, you're totally ready to go."

"The creative process is what it's all about," added OBEDIA co-founder Steve Garth. "If you're serious enough to purchase a specialized music computer, then you're serious about making music. At OBEDIA, we make sure that your creativity can flow uninterrupted, 24 hours a day, seven days a week, from anywhere in the world."

Complete information on Terra Digital Audio's full line of computers and the OBEDIA package they're offering can be found at www.terradigitalaudio.com.

OBEDIA provides a wide range of technical expertise to artists and manufacturers in the digital media, music, and pro audio communities. Services include training and customer support, as well as systems integration, installation, and maintenance. OBEDIA operates globally 24 hours per day, seven days a week, and guarantees 100% customer satisfaction. For more information on OBEDIA services, please visit www.obedia.com.
